Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 November 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6 and 11-12 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Features critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

As per claim 6, this claim is rejected under 35 U.S.C. 112 2nd, as omitting essential subject matter. Specifically claim 6 recites three components; namely, a controlled device, a remote control device and a terminal. The actual claimed states that device specific data is first stored in the controlled device, then this data is received by something and then something generates a WEB display based on the data, wherein the display data is then transmitted to the terminal. The method does not ever include the remote control device in the actual method and therefore the claims omits essential subject matter since it would appear that the use of the remote control device is essential to the overall method or there would be simply no need to claim it in the first place. That being said, the “receiving” step is interpreted as being performed by the remote control device.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Hayes, U.S. Patent No. 7,046,161.

As per claims 1-2 and 5-6, Hayes discloses a system and method for automatically setting up a universal remote control. Hayes discloses that device ID data may be transmitted to a server, whereby commands are generated for configuring a remote control. Hayes also teaches the utilization of HTML and web pad technology (e.g. See [0029], [0075], [0077], [0080], [0082], [0085] and [0087]).

As per claims 3, 7, 9 and 11, Hayes further teaches a controlled device being a video recording device (e.g. a VCR).

As per claims 4, 8, 10 and 12, Hayes further teaches device ID data being related to a recording operation, per se (e.g. See Figures 8a and 8b).
